DETAILED ACTION

1. This Office action is in response to Application No. 09/765,751, filed on 01/19/2001.
2. Claims 1-27, and 29-34 are presented for examination.

NOTE

3. Claim 28 is missing from this application.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3621

Rejection under 35 U.S.C. 102 (e), Patent Application Publication or Patent to Another with Earlier Filing Date, in view of the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002.

(e) the invention was described in (1) an application for patent, published under section 122 (b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351 (a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21 (2) of such treaty in the English language.

5. Claims 1-27 and 29-34 are rejected under 35 U.S.C. 102 (e) as being anticipated by Kuroda et al. (U.S. Pat. No. 6,421,779).

As per claims 1, 4, 6-9, 11, 13-16, 18, 21-25, 27, 30, and 31-33 Kuroda discloses an electronic data storage function identification information using a medium such as a floppy disk, etc. to, for example, a hardware vendor which generates the electronic data storage function, comprising the steps of: obtaining transaction information from a vendor (see., col 15, lines 43-47, col 17, lines 13-20); obtaining user information, including a secret key from a user (see., col 14, lines 43-52, specifically wherein it is stated that the user can simply inputs the authentication information data to the electronic data storage, and obtain a storage certificate for each of the operations. The electronic data

Art Unit: 3621

with authentication information can be encrypted (encrypted or secret key or private key) for output using a master key);

electronically performing a message authentication code (MAC) function on at least some of the transaction information and some of the user information (see., col 12, lines 56-67, col 13, lines 23-29); and

using a result of the MAC function as private transaction information (see., col 12, lines 56-67, specifically wherein it is stated that the electronic data storage uses as data the result of linking the electronic data with the transaction identifier, and generates an authentication information MAC using a master key). Kuroda further discloses the step of comparing or verifying a result of the received information (see., col 13, lines 6-22, and also it is inherent to know that the MAC of Kuroda can be used as a credit card).

As per claims 2, 5, 10, 12, 19, 26, and 29, Kuroda discloses the claimed method wherein the step of obtaining information comprises obtaining at least one of a name of the vendor, a URL, a transaction amount, a date of transaction, and a time of transaction (see., fig 29, col 18, lines 22-28, specifically wherein it is stated that the information and the number are stored for each vendor name).

As per claims 3, 17, 20, and 34 Kuroda discloses the claimed method wherein said adding a counter value to the transaction information (see., abstract, col 2, lines 47-54, specifically wherein it is stated

Art Unit: 3621

the authentication information data output device externally outputs the electronic data stored in the data storage device, it adds to the electronic data).
